

Course title	Coding 1
Course code	
Year/semester/block	Year 1 – alternating block per semester for A/B classes
Structure	1 x 4 hrs per week
Duration	16 weeks
Tutor(s)	François Girard-Meunier, https://www.kabk.nl/docenten/francois-girard-meunier
Course description	This course introduces students to the usage of code as part of the design work-flow as well as combining different software to create outcomes. Students apply coding in the basics of the web languages HTML/CSS and JavaScript.
Learning objectives	Select and evaluate appropriate tools, technologies, and resources for specific web design contexts to make informed web design choices.
	Develop original web outcomes by experimenting with coding techniques and translating references into personal solutions.
	Plan and organize web development projects independently by structuring tasks, adapting workflows, and set priorities in response to challenges or changing conditions in order to meet deadlines.
Teaching methods	Teaching is delivered through a combination of practical and theoretical introductions to coding languages, tutorials, exercises and assignments. Weekly teaching is supported by additional online and offline resources, such as input on basic programming concepts, their (inter)relationship, influential developments, reference material, examples and actionable suggestions tailored to the content of the course and its assignments. Students receive formative support through active dialogue, feedback and an individual review during the course.
Assessment methods	The final grade is determined through a collective assessment, in which student work, the course assignments, a process journal, and a reflective presentation is reviewed alongside other semester course outcomes by the semester teaching team. Final results are published in Osiris with written feedback.
Grading scale	Pass/Fail
Compensation	Resit assignment, during following resit week
Attendance requirements	80%–100%
Entry level	Admission
Main competencies	X Artistic Creation
	X Research and Reflecting
	Connecting with the Environment
	X Working in a Practice
Study load (EC)	6 ECTS
# of contact hours	64h
# of self-study hours	104h
